	<ul style="list-style-type: none">• Slide Brew funnel into Filter guides and open Lid
	<ul style="list-style-type: none">• Fill carafe with cold water (10 cups)

- Pour cold water into brewer.
 - DO NOT close lid unless brew funnel and carafe are in place
 - Closing the lid releases HOT water

- Position carafe on base under brew funnel.
 - You may want to preheat the carafe by filling with HOT water from tap then dumping out, This will keep coffee HOT longer after brewing.
 - Put Brew through lid on carafe
 - Line up arrows, then turn right $\frac{1}{4}$ turn to lock

- Close lid to start brew cycle

- When brew cycle is complete, remove brew funnel and discard filter and grounds.
